SKILLS

Programming: C#, C++, Python, JavaScript

Engines & Frameworks: Unity, Unreal Engine 5, Photon Quantum, Photon Fusion, Unity Netcode, Oculus / XR

LANGUAGES

Spanish: Native

English: Fluent

Japanese: Intermediate

EDUCATION

Bachelor's Degree in Game Development
UADE
Mar 2024 – Dec 2026 (expected)

Technical Degree in Game Development
UADE
Aug 2020 – Dec 2023

CERTIFICATIONS

Python Django Course, Coderhouse (2023)

SUMMARY

Game developer since 2023, working professionally with unity and C#, with experience in Unreal Engine. I spent two years at 3Dar programming for Eggscape, a multiplayer VR game. I'm always looking for ways to improve my workflow, so I build my own tools when I need them. Outside of work I continue to make my own games, like Rush Rift, that was exhibited at EVA 2026.

EXPERIENCE

Game Developer
Skynet Games
Feb 2026 – Jun 2026
Early-stage mobile platform where companies promote their products through branded minigames.

- Delivered a playable tap minigame in 3 months and started a second one, by building gameplay, UI and a color-and-shape instruction system in Unity.
- Cut the time to set up a new branded minigame from about a day to under an hour, by building a customization system where assets, settings and parameters are edited in one place.

Game Developer
3Dar (Eggscape)
May 2023 – Feb 2025
Technologies: Unity, C#, Photon Quantum, Oculus XR

- Built enemy types that chase, avoid obstacles and attack, each with its own fighting style, by programming their movement and combat states with behavior trees.
- Implemented a flying kick and a spinning kick that gave the player 2 new ways to attack, with their own animation timing and hit detection.
- Programmed a wall-climbing mechanic used across the levels.
- Built one grabbing and throwing system that handles different types of objects and weapons, so every new item worked without extra work.
- Fixed bugs across gameplay, UI and multiplayer for 21 months, from small glitches to crashes, so every release shipped stable.

PROJECTS

Rush Rift: First-person speedrunning game where the level's layour change every time you unlock medals. Exhibited at EVA 2026. luinbucket.itch.io/rushrift

Passenger Panic: A Crazy Taxi-style arcade game where you drive a bus through Buenos Aires and pick up as many passengers as you can before time runs out. luinbucket.itch.io/passenger-panic

Idle Airport: an incremental airport prototype where you turn a slow, single-lane security checkpoint into a more efficient passenger-processing machine danidieguez.itch.io/idle-airport

Gun Bandit: Top-down 2D shooter with multiple weapon-based play styles. luinbucket.itch.io/gunbandit
